Passion with lights

About Us

Pasolite is one of the oldest Lighting Solution Provider Operating from Bengaluru, to build a brand on the back of its in house production. However, what's different is that we use the international production facilities as the back-end of our operations, and focus on adding value through design and packaging.

Pasolite is the brand name under which Pasolite Electricals Pvt. Ltd., Markets its products. Unfettered by manufacturing, the company has build of formidable range of LED products, for practically all types of applications.

From Retail and Commercial in indoor to Facade and Landscape lighting in Outdoor, we offer a vast array of adoptive luminaries designed to reveal the soul of any architecture space.

A Disciplined Process

The company's modus operandi reflects the growing instance of outsourcing across all lighting categories, irrespective of the country from where products are originating.

The differentiator, therefore, is the manner in which a company chooses to builds its brand, the commitment that it makes with respect to quality, and the confidence levels that it is able to create amidst the trade.

Our Vision

At Present, we cater to the lighting requirement for various projects throughout INDIA, with sales and distribution via independent lighting channel partners throughout country. our aim is to build up relation with renowned consultants and Architects. Our range allows us offer our clients extensive and quality products.

At Pasolite, we help architects and designers capture creative inspiration. our design innovation opens up limitless possibilities.....

The forms shares, styles, finishes and customs solutions that bring ideas to life. High qualities, great flexibility, extremely prompt deliveries- it is an important recognition of our quality process, which allows our customers to be absolutely confident in the faithful fulfillment of our engagements and in the continuity of our business relation.

Our Mission

To be No 1 choice for all lighting need by not only providing light fixtures, but also providing the right solution to any lighting concept. To be able to transform architects and designers lighting dreams into reality by providing quality, state of the art and innovative designs of lighting. we strive to attain a position of long-term, sustainable pre-eminence in the lighting field "lighting up" both our customers and ourselves.

As we are constantly innovating and expanding our product range, this catalogue can never be completely upto date. if you require specific information about new products, changes in our product programme, please contact our channel partners.

Ingress Protection system

Protection against ingress of solid bodies, dust and moisture:

The ingress protection system (IP) EN 60529, 1991 defines various degrees of protection against the ingress of foreign bodies, dust and moisture. The term 'foreign bodies' includes things like fingers and tools coming into contact with the electrical live parts of the luminaire.

Both safety aspects (contact with live parts) and harmful effects on the function of the luminaire are defined. The exact testing method for each IP classification is described in EN 60529.

Note that the conditions during testing might differ from the specific conditions in an application

The designation to indicate the degree of protection consists of the characteristic letters Ip followed by 2 digits indicating conformity with the conditions stated in two tables.

It is important to realize that the specification and safety of luminaires are only secured if the necessary maintenance according to the instructions of the manufacturer is carried out in time. Luminaires are not available in all possible combinations of ingress and moisture protection. The most common applications of the IP classifications for luminaires are:

IP20:

Luminaires which can be applied indoors only if no specific pollution rates are expected. Offices, dry, heated industrial halls, shops, shopping malls and theatres are typical application segments.

IP21/22:

Luminaires which can be applied in unheated (industrial) halls and under Canopies as the luminaires are drip-and condensation-water-protected.

IP23:

Luminaires which can be applied in unheated industrial halls or outdoors.

IP43/44:

Luminaires and bollards for outdoor street lighting and street lanterns. Bollards mounted at a low height are protected against small solid objects and against rain and splash.

A common combination within an industrial high-bay luminaire or street lantern is Ip 43 for the electrical part of the luminaire, to secure safety, and IP 54/65 for the optical part of the luminaire, to prevent pollution of reflector and lamp.

IP 50:

Luminaires which are applied in dusty environments, to prevent rapid pollution of the luminaire.

The exterior of IP 50 luminaires can be cleaned easily. In the food industry closed luminaires are specified to prevent glass particles from accidentally broken lamps entering the production area and contaminating the products under preparation.

Although ingress protection is specified to protect the luminaire function, it also means that particles cannot leave the luminaires housing. Thereby meeting the specification of the food industry. In the 'wet' food industry luminaires meeting the IP 50 classification shall not be applied.

IP 54:

The traditional water-protected classification. Luminaires can be cleaned with water without any harmful effect. This classification is often specified in the food processing industry, for industries where dust moisture are generated in the hall, and for use under canopies.

IP 60:

Luminaires which are completely sealed against dust accumulation, and are used in very dusty environments (wood and textile industry, stone carving) and in the food industry as explained above. IP 60 luminaires are rarely applied; IP 65/IP 66 is usually applied instead.

IP 65/ 66

Jet-proof luminaires which are applicable where the surroundings are hosed down frequently by water jets, or where luminaires are applied in a dusty environment. Although the luminaires are not fully watertight, the potential ingress of moisture will not have any harmful effect on the luminaire function. IP65/66 luminaires are often available in impact-protected versions.

IP67/68

Luminaires complying with this classification are suitable for immersion in water.

Typical application areas are underwater lighting of swimming pools and fountain lighting.

Deck lighting on ships should also meet this classification. The test method does not imply that IP 67/68 luminaires meet the IP 65/66 classification as well.

First Number	Description	Explanation	Second Number	Description	Explanation
0	Not protected	Not protected	0	Not protected	Non protected against moisture
1	Hand protected	Protected against solid objects exceeding 50 mm in diameter	1	☼ Drip proof against Vertical water drops	Water drips falling vertically shall have no harmful effect.
2	Finger protected	Protected against finger contact with live parts and against objects exceeding 12 mm in diameter	2	Drip-proof when tilted At angles up to 15°	Water drips shall have no harmful effect.
3	Tool protected	Protected against contact with live parts by tools, wire or similar objects over 2.5 mm thick; and Protection against penetration of Solid objects exceeding 2.5 mm in diameter	3	☼ Rain-/Spray Proof	Water falling at an angle of up to 60° shall have no harmful effect.
4	Wire protected	Protected against contact with Live parts by tools, wire or similar Objects over 1 mm thick; and Protection against penetration of Solid objects exceeding 1mm in diameter	4	☼ Splash Proof	Splashing water from any direction shall have no harmful effect.
5	Dust accumulation ◆ protected	Complete protection against Contact with live parts and against Harmful accumulation of dust some dust may penetrate but not to the extent that operation is impaired	5	☼☼ Jet-Proof	Water protected by a nozzle from any direction shall have no harmful effect. (Nozzle dia 6.3mm, pressure 30 kpa)
6	Dust penetration ◆ protected	Complete protection against contact with live parts and against penetration of dust.	6	Jet-Proof	Water protected by a nozzle from any direction shall have no harmful effect. (Nozzle dia 12.5mm, pressure 100 kpa)
			7	Water tight ☼☼	Watertight; temporary immersion in water under specified conditions of pressure and time possible without ingress of water in harmful quantities.
			8	Pressure Water tight ☼☼	Pressure Watertight; continuous submersion in water under specified conditions of and time possible without ingress of water in harmful quantities.

TERMS & CONDITIONS:-

1. The prices quoted above are nett.
2. All local taxes are payable as applicable.
3. Prices are subject to change without prior notice.
4. This cancels all our previous price lists.
5. The above prices are on ex-godown basis.
6. Packing and forwarding charges extra.

All dimensions are in millimeter
L = Length, B = Breadth, H = Height,
D = Depth, W = Width.
